

**Expansion joint gap survey information.
May 7TH & 20TH 2014.
Measurement difference gap survey sheets.
From 2012 to 2014.**

INSPECTION DEPARTMENT
DEMAG PLATE GAP SURVEY MEASUREMENT DIFFERENCES
DATE: . 13 & 19/06/12.To 7 & 20/05/14.

Following the gap survey carried out (7th & 20th May 2014) on the main span rocker plates and slide plates No.1 and No.2. Also side span rocker plates and slide plate No.1.

All expansion joints were included in this survey to establish the wear from survey conception date to present survey date.

Below are survey sheets recording measurement differences between the two survey dates which are variable and sizes range from 0mm to 4.5 mm.

Bridge Inspectors:
