

PP. 23.5. TO PP 20. Main	nded structure principal inspection (Side span north) SSNPI. 03 span North.		
Location / Area of Inspecti	on.		
Element / Part / Item	Recorded defects.:	Inspection Date.	Repairs completed
	(Structure number if applicable)	Inspector.	Date.
Deck Soffit.		. 27.05.15.	
	Concrete remains in a satisfactory condition., through areas inspected between PP. 23.5. TO PP. 20.		
Trough stiffeners.	N/A	27.05.15.	
Stringer bearing pads.	Heavy corrosion, paint breakdown on stringer bearing plate edges and bolts.	27.05.15.	
Cross girder beams.	All bolts intact & secure. Areas of corrosion evident. Protective coating required. Located at pp. 20 on beam No 1. (East only) redundant conduit requires to be removed.	. 27.05.15.	
Billets.	N/A. NO BILLETS ON SIDE SPAN STRINGERS.	27.05.15.	
Top laterals.	corrosion & paint breakdown evident on bolts. No bolts missing. Top bolt cluster bolts intact & secure.	27.05.15.	
Bottom laterals.	Discolouration on exposed steelwork. Requires to be washed down. TBD. Access required.	.27.05.15.	
Braking girders.	N/A At this location	.27.05.15.	
King posts.	TBD. Access required.	.27.05.15.	
Vertical trusses.	corrosion evident on inner & outer faces. On top connection bolt clusters. Bottom bolt clusters to be completed. Top bolt cluster bolts intact & secure.	.27.05.15.	
Diagonal trusses.	corrosion evident on inner & outer faces. On top connection bolt clusters. Bottom bolt clusters to be completed. Top bolt cluster bolts intact & secure	.27.05.15.	
Top chord (general)	Heavy corrosion & ,paint breakdown evident on chord underside in areas No bolts missing Discolouration on exposed steelwork. E&W faces. Requires to be washed down.	.27.05.15.	
Bottom chord (general)	TBD. Access required.		
T/ chord splice boxes	Heavy corrosion. & paint breakdown evident on Access cover plates , threaded stud bolts & nuts.	27.05.15	
B/chord splice boxes	TBD. Access required.		
Service ducts/ conduits	Utility ducts located under inner balustrade both E &W , holdfasts require to be replaced as required. Bolt missing from clamp on small duct located at PP. 23 EAST. Tri-ducts located under cycle track on the "A" LINE walkway, expansion	. 27/05/15.	
Drains /down-pipes	sleeve jubilee clips require to be replaced. All holdfasts & clamps remain in a satisfactory condition between PP. 23.5 To PP. 20.	. 27.05.15.	
Walk-way supports.	Galvanisation of all walkway angle supports breaking down., quite heavy pitting & salt presence evident. All support fixings have evidence of paint breakdown evident. & medium to heavy corrosion evident on lindaptor	. 27.05.15.	
Walk-way decking.	fixings Loose or missing floor clips. Located on A.C & D lines. Expamet flooring , slight corrosion evident.	27.05.15.	

spection.		
Recorded defects. : (Structure number if applicable)	Inspection Date. Inspector.	Repairs completed Date.
Cycle track deck soffit deck panel steelwork both E & W, paint breakdown, salts & areas of corrosion evident. Intermediate transverse beams have areas of corrosion & paint breakdown evident	.27.05.15.	
All remain intact and in-situ, compression and cracking evident on all elastomeric bearings within these locations	.27.05.15.	
All Remain in a satisfactory condition all castings, top chord assemblies. fixings & bolts satisfactory.	.25.05.15.	
Remain in a satisfactory condition. fixings & bolts satisfactory.	.27.05.15.	
N/A. At this location	.27.05.15.	
TBD	.27.05.15.	
areas of corrosion & paint breakdown evident throughout upper front. Redundant electrical conduit running from pp. 24 to pp. 20. on the underside of the centre crillage, requires to be removed.	.27.05.15.	
please refer to individual locations for paintwork condition, in general, all areas require remedial paintwork to be carried out.	.27.05.15.	
please refer to individual locations for corrosion condition, in general, all areas require remedial works to be carried out prior to the application of new protective coating.	.27.05.15.	
All remain intact & secure. Beam support blocks please refer to individual locations for corrosion condition, in general, all areas require remedial works to be carried out prior to the application of new protective coating.	.27.05.15.	
General comments. :	General comments.:	General comments.:
